

Dunn County Broadband Survey Now Available

From Eric Turner, Exec. Dir. of the Dunn Co. Economic Development Corp.

Good afternoon all,

For the past twenty plus years, the internet has become part of many parts of our life. The amount of time that we make use of this technology is directly related to the quality, speed and cost of broadband to which we have access. From what was once seen as a novelty, is not an integral part of how we learn, communicate, receive emergency services and do business. Arguably, broadband coverage will be as important to Dunn County, WI in the 21st century as the Rural Electrification Act was almost 80 years ago!
